### Great Lakes Ace Clyde Adds Lumber to the Offering

Clyde, OH. April 19, 2021 – The team at Great Lakes Ace Hardware in Clyde, OH is thrilled to announce the opening of a new lumber shed. The local team is focused on being helpful to their neighbors and this expansion is just one more way to accomplish that goal.

The lumber shed will be filled with plywood, drywall and dimensional lumber, just what the home handy person needs to build a deck or renovate a room. “We heard from customers that they were looking for a convenient place to quickly and easily get the building supplies they needed for home improvement projects. Customers were already visiting the store to pick up the tools and hardware they needed so adding building materials seemed like the helpful thing to do,” said Caleb Wynbissinger, Store Manager.

For the novice handyman, the team at Great Lakes Ace Clyde is there to help guide you through the process of selecting all of the materials and tools you will need to get the job done. The lumber shed is open during the same hours as the store, Monday – Saturday 8:00 am – 7:00 pm and Sunday from 10:00 am – 5:00 pm.

Great Lakes Ace Hardware began operation in Dearborn, Michigan in 1946 and has a history steeped in the traditional American tale of hard work and reinvention. The company provides local neighborhoods with access to national brands such as Craftsman, Scotts, Benjamin Moore, EGO, Traeger, and others, while providing customers with a localized product mix and a friendly neighborhood hardware store experience. The chain operates 58 stores serving neighborhoods in Michigan, Ohio, Indiana and Kentucky. It has been part of the Ace Hardware Cooperative since 2014.
