|---|--|
| <input type="checkbox"/> Lawn Rake                    | <input type="checkbox"/> Whitney Farms® Organic Raised Bed Mix |
| <input type="checkbox"/> Ace® Biodegradable Lawn Bags | <input type="checkbox"/> Seedlings of Your Choice              |
| <input type="checkbox"/> Soil Testing Kit             | <input type="checkbox"/> Gardening Gloves                      |
| <input type="checkbox"/> Compost                      | <input type="checkbox"/> Small Garden Shovel                   |

#### Steps To Preparing An Organic Garden:

##### **1** Prepare & Test Your Soil:

Clear an area of any debris and dead material using a lawn rake and biodegradable lawn bags. Make sure the soil is tested for a complete breakdown of PH and nutrient levels, as well as treatment recommendations. Your soil should have plenty of humus.

##### **2** Choosing the Right Plants:

Choose plants that will be well adjusted in terms of light, moisture, drainage and soil quality. It's better to buy stocky seedlings with few, if any blooms yet, and with roots that don't look over crowded.

##### **3** Planting:

Group harvesting plants together tightly in beds that you don't walk on (i.e. raised beds). Grouping reduces weeding and water waste. Ample space between rows helps promote air circulation, which repels fungal attack.
