| <input type="checkbox"/> Tape Measure                              | <input type="checkbox"/> Great Stuff™<br>Expanding Foam |
| <input type="checkbox"/> Scissors                                  | <input type="checkbox"/> Two-sided Tape                 |
| <input type="checkbox"/> Hair Dryer                                | <input type="checkbox"/> Door Sweep                     |
| <input type="checkbox"/> Foam, Felt or Rubber<br>Weather Stripping | <input type="checkbox"/> Window Cleaner                 |
| <input type="checkbox"/> Caulk                                     | <input type="checkbox"/> Paper Towels                   |
| <input type="checkbox"/> Caulk Gun                                 | <input type="checkbox"/> Hydraulic Door Closer          |

### 3 Important Steps

- 1** Be sure to clean windows before installing window kits for the clearest view. Use plastic window kits with a hair dryer to seal drafty windows. Kits provide all the items you need in one handy box.
- 2** Use weatherstripping to seal windows and doors where they meet the frame. Paintable caulk can fill and seal any cracks around the outside of window and door frames. For large holes or cracks use Great Stuff™ For Windows and Doors.
- 3** Check the door sweeps on the bottom of all your exterior doors to make sure they are creating a tight seal. If you have a screen door be sure its hydraulic closer is working properly to prevent excess drafts from entering your home.
