| <input type="checkbox"/> Snow Blower       | <input type="checkbox"/> NeverWet™                       |
| <input type="checkbox"/> Hat               | <input type="checkbox"/> 5 Gallon Bucket                 |
| <input type="checkbox"/> Gloves            | <input type="checkbox"/> Bucket Lid                      |
| <input type="checkbox"/> Hand/Foot Warmers | <input type="checkbox"/> Scoop                           |
| <input type="checkbox"/> Roof Melt         |  |

### 3 Important Steps

- 1** Clear snow from sidewalks and driveway using a snow blower or shovel. Spray your shovel with NeverWet™ as a great way to prevent snow build up and extra weight on the shovel.
- 2** Spread ice melter on walkways, porches, or decks using the Whiz™ spreader. Premium products like calcium chloride are great on concrete and wood decks. They are more effective to lower temperatures than rock salt and won't destroy your grass. Use our Pet Friendly option to protect your pet's paws. Store in a 5 gallon bucket with lid to prevent moisture absorption.
- 3** Utilize a roof rake to safely remove built up snow on your roof and then use roof melt as directed to prevent ice dams and damage to your home.
