

KNOW HOW IN NO TIME

Hang Your Lights

Tools & Materials Checklist

- | | |
|---|---|
| <input type="checkbox"/> All Purpose Light Clips | <input type="checkbox"/> 3 to 2 Grounding Adapter |
| <input type="checkbox"/> Decorating Pole | <input type="checkbox"/> Light Bulb Socket Plug Adapter |
| <input type="checkbox"/> Light Tester | <input type="checkbox"/> Ladder |
| <input type="checkbox"/> Twist-Tie Material or Velcro | <input type="checkbox"/> Outdoor Timer |
| <input type="checkbox"/> Outdoor Extension Cord | <input type="checkbox"/> Gloves |
| <input type="checkbox"/> Outdoor Power Stake | <input type="checkbox"/> Tape Measure |

3 Important Steps

- 1** Inspect all light strands for frayed or damaged cords. Test all lights before starting to decorate so you don't have to take any lights back down to replace.
- 2** Locate the power receptacle and then plan out how you will run power to your decorations before you start. Make sure to follow all manufacturer recommendations on how many light strands you can safely string together. LED lights are a great way to save money on energy costs since they don't overheat and you can safely string together more strands than traditional incandescent lights.
- 3** Use all purpose light clips to safely and securely hang light strands without damaging gutters or shingles. Use a decorating pole in conjunction with a ladder or by itself to decorate hard to reach roof lines and trees. For railings, try some twist-tie material or Velcro to secure light strands.
